

CASE STUDY 7 - PERFAT RUBY 1500 ON POMPANO, *Trachionotus fasciatus* - MALAYSIA

Challenge:

- A customer has the following challenge
 1. To observe growth effect of Perfat Ruby 1500 on Pompano
 2. Control versus treated pond was considered

JF Nutritech Solution: Engineered solutions to maximize value and efficiency for customer's asset.

- Perfat Ruby 1500 is proposed as an organically natural supplementary solution to solve for customer's pigmentation issue and feed efficiency
- Quantitative changes to pond produce is recorded on weekly basis

Results

- **Trial length** : 91 days
- **Weight data** : ~130 gm to 580 gm (91 days)
- **Average Daily Gain (ADG)** : ~4.90 gm
- **Growth Performance** : Mass Growth of treated vs Control pond improved by 23%
- **Survivability** : Survival Rate of 95%
- **Feed Conversion Ratio (FCR)** : Improved to 1.77
